A Cat's Sense of Locality.

A kitten about six months old was taken to a house a few miles distant from its birthplace, confined in a room and tenderly cared for during a week, and then set at liberty. It was supposed to have become habituated to its new surroundings, but it returned to its old home on the day of its release. The sense of locality and direction was exhibited still more atrikingly by an old tomeat which was stolen and carried a distance of twenty miles, confined in a bag. The cat was imprisoned, but made its escape, and in a few days reappeared in a pitiable state at the home of its former master, which was sefarated from that of the thief by a high wooded cliff.—Scientific A Cat's Sense of Locality. high wooded cliff .- Scientific
